STAT

I have reviewed the revised legislative program for the Second Session of the 99th Congress contained in reference B. My original reservations remain; with each revision it's getting worse (items 2, 5, 7, 8-11, 16-20). Before we are through, the proposed FY 1987 Intelligence Authorization Act will be so laden down with non-germane provisions, it will take two men and a boy to carry it to the Hill.
